The Tool Box

By John Firth

The purpose of this column is for members who are either restoring a Model A or are working on issues that need correcting or updating to share their experiences and progress with the club. But I won't know what you are doing unless you tell me about it, so give me a call!

Mike McKey got his sedan running after resolving some carburetor problems. Nice job, Mike!

Dale Waldron has Kitty's special coupe nearly done. They are hoping to put some miles on it and get all the bugs worked out before its maiden voyage to Coos Bay for the Oregon Tour in July.

Craig White is making progress on his pickup and his dad's huckster.

Dallas Nielsen nearly has the top wood on his special coupe completed. Just a little more final fitting to do.

Jerry Schulte is working on installing new valves and valve guides for his 28 roadster pickup.

If you have updates, call me at 541-474-1516. If you need help with something, as long as you are a member in good standing of Henry's Lady, you can call Chuck Green 541-471-9214 for a Busted Knuckles consultation.

Keep turning those wrenches!

John

Be aware that the availability of knowledge and repair services is diminishing as Model A hobbyists and experts age, so if you have a project on your list, let this be a reminder and an incentive to get it started sooner rather than later! Kudos to Mike McKey for reminding us.
